<p>Stratocumulus</p> 	<p>Cumulonimbus</p> 	<p>Altostratus</p> 
<p>Alto cumulus</p> 	<p>Nimbostratus</p> 	<p>Cirrocumulus</p> 
<p>Cirrus</p> 	<p>Cirrostratus</p> 	<p>Stratus</p> 

**Gumulus**

White, puffy clouds on a fair day may warn of rain in 24 hours.

**Stratus**

Low and flat foggy clouds cover the sky and make rain.

**Cumulonimbus**

Tall, dark, full clouds are thunderstorm clouds.

**Nimbostratus**

Dark gray clouds covering the sky make a light rain or snow.

**Alto cumulus**

Gray, puffy clouds, formed in groups, warn that thunderstorms will come.

**Altostratus**

Gray clouds covering the sky warn that rain is coming.

**Cirrocumulus**

Small, round puffs in long rows appear on fair, cold days.

**Stratocumulus**

Low, puffy gray clouds, with little visible sky, may warn of rain to come.

**Cirrostratus**

Wispy cloud sheets warn that rain or snow will come in 12-24 hours.

**Cirrus**

Wispy cloud on a fair day may warn that rain will come in 24 hours.
